CAREER OBJECTIVE

- **Mobile Application Developer** with **4 years of experience** (2 years professional), specialized in Flutter with **3 published apps** on app stores.
- Seeking to leverage cross-platform expertise while expanding into **native mobile development** (iOS/Android) to deliver scalable, user-focused solutions.

WORK EXPERIENCE

Jr. Mobile Application Developer @SNT Yazilim ve Finansal Teknolojiler A.Ş.

Jan 2024 - Present

- Implemented **MVVM-S** architecture with **RESTful API and WebSocket** services, enabling real-time trading, portfolio management, and market analysis features.
- Implemented real-time features, state management **Cubit/BloC**, and Firebase integrations **(Analytics, Firestore, Cloud Messaging, Crashlytics)**.
- Collaborated with the design team to deliver **pixel-perfect Figma implementations**, ensuring high-quality **UI/UX** across platforms.

PROJECTS

InfoX - AI Powered Smart Investment Application

Jan 2024 - Present

- Developed InfoX, an AI-powered **financial investment app** with features such as portfolio management, stock trading, robo-advisor services, and real-time market analysis.

Quicko - Minigames

Aug 2025 - Present

- Built Quicko, a cross-platform Flutter app featuring **10+ casual minigames**, 10+ language support, and **global leaderboards** for competitive gameplay.
- Implemented with **AdMob** for monetization, **Firestore** for real-time data management, **Lottie** for interactive animations, and **Git** for version control; also applied **l10n localization** for multi-language support and successfully **published the app on app stores.**

Elements - Learn & Play

March 2023 - Current

- Developed a **Periodic Table** learning app that provides detailed information about **elements** and includes a **Quiz section** to support faster and more effective learning.
- Implemented **CI/CD pipelines** for automated deployment, integrated **Firebase Messaging** for push notifications, applied **Provider** for state management.

Flutter Base Project

Jan 2022 - July 2023

- Integrated essential layers and libraries including **constants**, **extensions**, **serialization**, **network**, **cache**, **localization**, and **theme management**, providing a scalable and reusable project foundation
